

PERFORMANCE HORSE FEED

The beet pulp-based textured feed for mature show and performance horses.

- Designed To Help Support Muscle Strength
- Supports Stamina And Endurance
- Supports Topline
- Promotes Hoof Growth
- Helps Support Digestibility

MINIMUM FEEDING RATE

Recommended minimum feeding rates are found by matching the current body weight and the status of the horse in the table below.

EXPECTED MATURE HORSE WEIGHT	250 lb	500 lb	1,000 lb	1,500 lb	2,000 lb
MAINTENANCE/LAY UP	1.0	2.0	4.0	6.0	8.0
LIGHT EXERCISE	1.5	3.0	6.0	9.0	12.0
MODERATE EXERCISE	1.75	3.5	7.5	11.0	14.5
HEAVY EXERCISE	2.0	4.0	8.0	12.0	16.0
INTENSE EXERCISE	2.5	5.0	9.5	14.5	19.0

Feed hay/pasture at a rate of 1-1.5% of body weight daily.

Feeding rates for mature weight and status are minimum pounds/day for that horse. Amount can be increased if extra body weight is needed. Consult with a veterinarian or nutritionist for a recommended diet.
